

Experiment (1/6): Evaluation of the Base Policy for Generalizable Grasp Decision

- high learning efficiency with the HOI-based decision model
- improved grasp-decision accuracy via joint multi-hand training

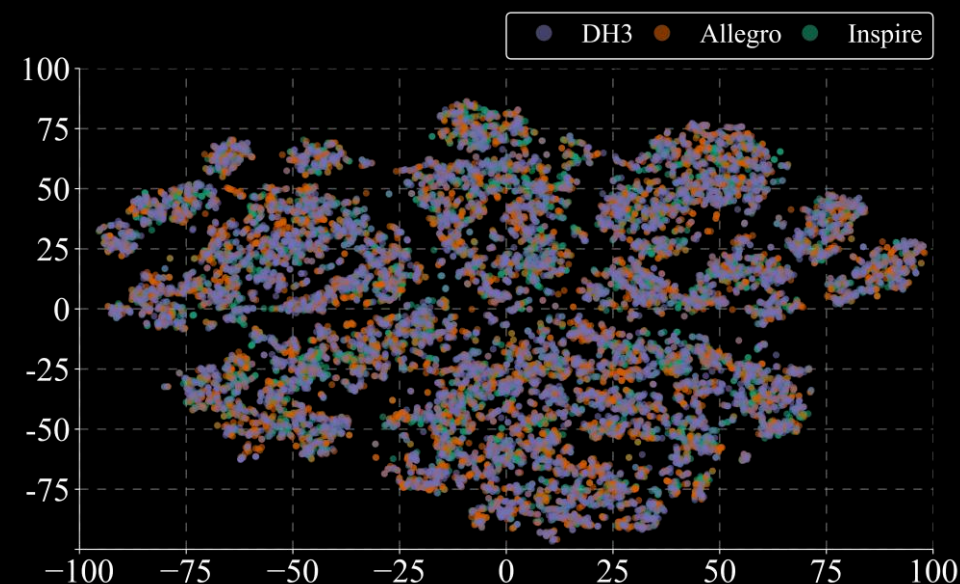

HOI representation is inherently compact and hand-agnostic!

(a) Training Convergence

Training Data	All	DH3	Allegro	Inspire
		82.95%	88.02%	91.07%
	Inspire	55.44%	72.48%	89.06%
	Allegro	56.25%	86.31%	74.25%
DH3		81.26%	75.46%	65.99%
		DH3	Allegro	Inspire

(b) Cross-hand Accuracy

(c) Hand-agnostic HOI Space
